

# ROTHOSCHOOL ON TOUR NEW ZEALAND

## WHY PARTICIPATE?

A full day dedicated to mass timber construction for both aspiring professionals and experts. Featuring a mix of local and international speakers, with research and case studies, it is a great chance to keep up with all the latest developments and engage in unique networking.

During the course there will be a focus on innovations in timber constructions and connections, durability of timber structures, waterproofing and airtightness of the timber buildings, examples and case studies of mass timber structures in New Zealand and a look at Rothoblaas guidelines for building with timber.

## TARGET

This seminar is for architects, designers, structural engineers, people interested in the timber field, those involved in compliance, and timber construction enthusiasts seeking to create and build significant relationships within the sector. A chance to stay updated with the latest construction trends and technologies on the market.
